# Words'Touch by   after-mouse.com

Bring your family back together!

Words'Touch is an educational game to help children practice spelling, organization, and gain confidence in their vocabulary. An image is presented on screen with a number of alphabetical tiles. Players must recognize the image and pull the appropriate tiles into their stack to spell the word correctly. Images and words can be updated with an extranet for an additional fee, allowing superb flexibility among educators and parents! Points are awarded based on difficulty, with one correct answer moving to the next image. The player with the highest ending score wins!

How to Play

Words'Touch begins by selecting the number of players, one to four. The corresponding number of players will each receive a tile rack along their side of the game board.

The game will begin when an image is launched in the center of the gameboard, as well as a smaller version of the image on each player's tile rack.

The background of the game will be populated with various lettered tiles, some of which will help spell the image on screen, some of which will not. The object is for players to identify the image and spell it correctly in the tile rack.
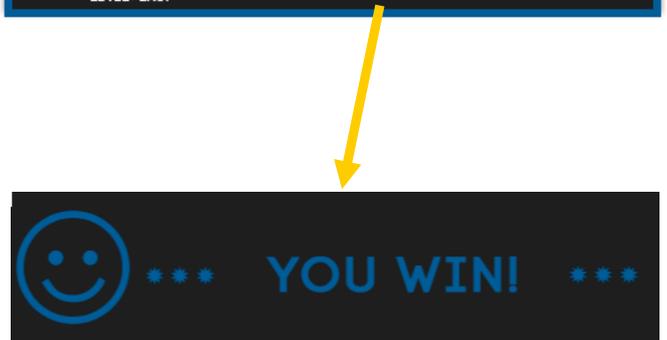

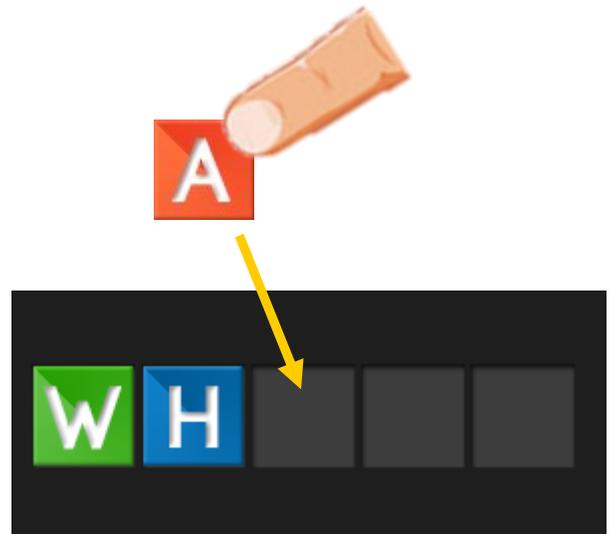

How to Play (Continued)

Tiles are moved by dragging them from the background to the appropriate outlined letter spot in the tile rack.

Once a tile is placed in one of the slots in the tile rack, it cannot be removed or changed position from within the tile rack. If a mistake is made, simply drag the correct letter from the background and drag on top of the incorrect letter in the tile rack, and it will replace it.
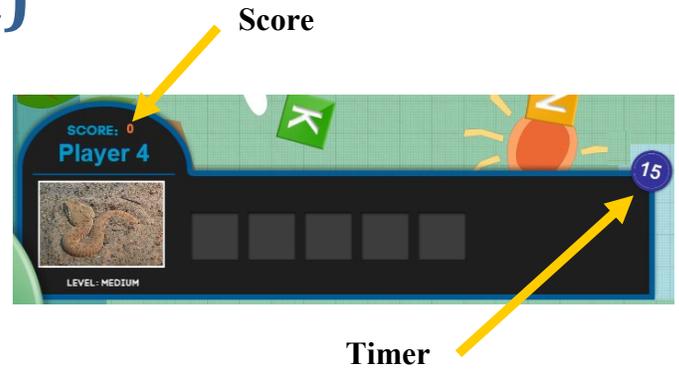

Regardless how many people are playing, each round ends with the first correct answer. There is a timer on each player's module indicating how much time is left. Players have 30 seconds each round to spell the word correctly.

Upon successfully spelling the word, the winning player will receive a congratulatory message before the game moves to the next round. If the word is spelled incorrectly, the player will receive a losing message. If none of the players are able to complete the word within the 30 second time frame, the tile racks will display a "Time's Up" message.
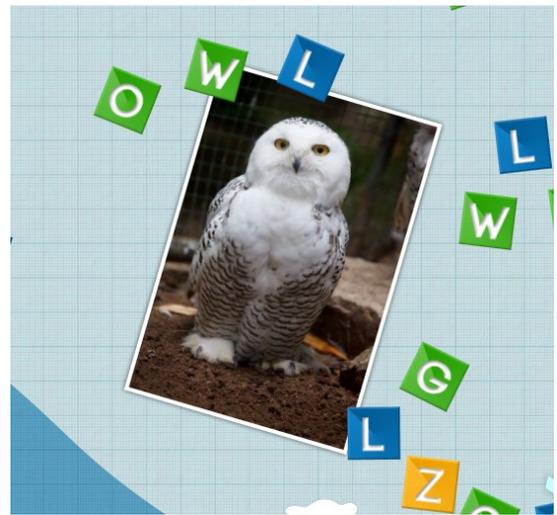

How to Play (Continued)

Each player's individual score is presented on their module, with points awarded by difficulty. Easy questions are worth one point, medium questions are worth two points, and difficult questions are worth three points. If using an extranet, you will determine each question's difficulty when uploading content.

Score

Timer

When the game ends, the player with the highest score is the winner. The game will restart at the home screen as soon as the question sequence ends.

Words'Touch also has an optional feature to update the content using an extranet. For an additional fee, this gives users the opportunity to change the photos and the associated words with each photo in the game. The standard content is to help with animal vocabulary, but with the extranet can be tailored to any educator or parent's curriculum. *support-games@after-mouse.com*

Customer support

Customer satisfaction is our number one priority at AFTER-MOUSE.COM. If you are having any technical issues with this game, please contact our customer support.
We will have a team member respond to your inquiry as soon as possible!

Thanks for playing!

Frequently asked questions

What are the system requirements to run Words'Touch?

Words'Touch requires a multi-touch device, Dual Core Processor with 2 GB minimum memory, 4 GB recommended memory for optimal speed. Full HD resolution is also recommended for best performance.

What is the recommended age for Words'Touch?

Words'Touch is suitable for children of any age in the process of learning to read and spell.

I accidentally dragged a letter into the wrong spot, or I dragged an incorrect letter. How can I fix this?

Once a tile has been placed in one of the slots, it cannot be dragged to a new place. However, you can replace the mistake by dragging the correct letter from the background to the tile's correct spot.

I spelled the word correctly, but my tile rack says I lost!

The round is finished as soon as one person answers correctly. Even if you correctly spell the word, you will not receive points if another player answered correctly first.

How are scores calculated?

Each question is labeled as either easy, medium, or difficult. Being the first to answer an easy question correctly will gain one point. Medium questions gain two points, and difficult questions gain three.

How long does the game take?

Words'Touch will cycle through each photo/word combination one time per game. As soon as all the content has appeared, Words'Touch will end and go back to the starting menu screen. If you have selected your own content through the extranet option, the game will cycle through your content once per game. However, you may exit the game at any time by selecting Quit from the Options menu.

How does the extranet work for adding my own content?

The extranet is available for a supplemental fee. Please contact us if interested and we will get you all the information and instructions you need to use this feature. Contact *support-games@after-mouse.com*.

How do I quit Words'Touch?

Touching the hand icon in the corner will launch the option menu, where you can quit, view instructions, or begin a new game with however many players you'd like to select.
